

August 19, 2020

Dear Governor Newsom:

We are Latino leaders across the state of California. We are philanthropists. Organizers. Small-business owners. Advocates. Students. Mothers. Fathers. Sons. Daughters. We are the personification of your Administration's mission for our state – a California For All.

Today, we write with an urgent ask to recognize the importance of the Latino community in California by appointing the first ever Latino or Latina United States Senator from our state. While we understand that the senate seat must first open, this is the moment to begin considering Latino leaders who are ready to fill this critical seat for our state's representation. This is also your timely opportunity to elevate the Latino community in one of our country's most important political institutions.

In the 150-year-old history of California, there has never been a Latino to represent our state in the United States Senate. Latinos make up nearly 40% of the state's population and 54% of the state's K-12 public school system. Latinos also make up the second largest voting bloc in our state and contribute over \$54B into the economy. And yet, our voice remains missing from the highest levels of our government.

For a community that has long been vital to California's civic and economic life, now is the time to use your executive authority to build a more reflective democracy in California and our country. Here's why:

Latinos have made it possible for California to become one of the most progressive states in our nation. In the 26 years following the passage of Proposition 187, Latinos have organized to achieve legislative wins that have benefited all Californians: carbon-free electricity by 2045, driver's licenses for undocumented immigrants, and guaranteed paid sick leave for all employees. To further add to our civic engagement, California now possesses the largest Latino voting bloc in the nation at 7.9 million eligible voters.

Economically, Latino small businesses represent nearly 25% of all businesses and are the fastest growing businesses in California with 43.9% growth between 2007 and 2012. In fact, California Latinos make up the largest number of entrepreneurs in the country (583,167) generating \$12.9B in earnings nationwide. From street vendors and musicians to restaurant owners and wine makers, our labor, creativity, innovation, and sweat drive California's economy to be the 5th largest in the world.

At the national level, there is an urgency to have another Latino voice in the United States Senate as we are 18.5% of the American population, but only make up 4% of the senate chamber. Of the four current Latino senators, only one of them is Latina who was recently elected in 2016. California is home to the largest number of Latinos, yet, we are behind in senate representation compared to states like Florida and Texas.

At a moment in history when a public health crisis has revealed deep inequities in health and in our economy, we need you to prioritize this appointment. Latinos in the United States are three times more likely than whites to contract COVID-19, and 60% of Latinos have reported job loss or pay cuts during this economic crisis.

This is why it is time to put Latino leaders in positions of influence who know the challenges and aspirations of our community. It is up to states like California to do their part to ensure that we are building more diverse and inclusive institutions reflective of our society.

We stand together in partnership with the Latino Community Foundation, the state's only philanthropic institution focused on unleashing the civic and economic power of Latinos in California, eager to support these efforts with

you and your team should a senate seat become available in the next 12 weeks.

Thank you,

Title and Organization for Identification Purposes Only
